Team Eastbound – Catalog.pdf

This file includes a catalog of all materials and instructions for grading the Team Eastbound Final Deliverable.

Contents:

++++++++

This zip contains the following:

1. Special Instructons.pdf – This is a PDF user guide - in readme context.  It gives explicit instructions on how to navigate/use both applications built for this team's final project.
2. Final Gant Chart.pdf – This is the final Gantt chart utilized by Team Eastbound from project inception to delivery noting completion of all stages.  Also included are the same tasks outlined by the Gantt chart displayed in table view.
3. src directory – This directory contains two .ZIP files:
    a. gatecheastboundemrav2-master.zip – Contains all source code for the EMRA Application (Can also be found at: https://github.com/ornelo/gatecheastboundemrav2)
    b. gatecheastboundalertemulator-master.zip – Contains all source code for the EMRA Emulator (Can also be found at: https://github.com/ornelo/gatecheastboundalertemulator)
4. bin directory – This directory is empty, but included for completeness.  This project does not require any local executable or binary.
5. doc directory – This directory includes the following:
    a. research.pdf – A list of links and descriptions that drove the decision to pursue this project and the problem(s) is attempts to solve through proof of concept.
    b. EMRA_Application_README.md – Standard readme for the EMRA Application
    c. EMRA_Emulator_README.md – Standard readme for the EMRA Emulator
